U.S. EXPORT SALES

- Outstanding Export Sales
(Unshipped Balances)
On December 28, 1975
 - Export shipments in
Current Marketing Year
 - Daily Sales reported
Dec 29 - January 6, 1976
- As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

U.S. DEPARTMENT OF AGRICULTURE, FOREIGN AGRICULTURAL SERVICE

EXPORT SALES REPORT

Comments on release of January 8, 1976 (based on reports from exporters during the week ending December 28, 1975, unless otherwise noted:)

Wheat: The apparent export commitment (cumulative exports plus outstanding sales) for 1975/76 increased by 592,400 metric tons (MT), bringing the total to 24.9 million MT during the first 6 months of this marketing year compared with 26.9 million MT for the comparable period last year. New sales of 312,700 MT to Egypt brought total 1975/76 commitments to that country to 746,500 MT, compared with 892,000 MT shipped during all of 1974/75. A 134,000 MT increase in the commitment to the USSR reflected transfers from optional origin rather than new sales. Commitments to unknown destinations increased by 55,900 MT and to the Republic of Korea by 49,600 MT.

Feedgrains: The apparent export commitment for feedgrains in 1975/76 increased by 399,900 MT, bringing total commitments for the first 3 months of the marketing year to 23.8 million MT. Corn commitments increased by 332,800 MT to a total of 19.9 million MT, compared with commitments of 33.8 million MT at this time last year. In 1974, however, reports of a poor U.S. corn harvest had precipitated abnormally large forward purchases by this time of the season, some of which were subsequently cancelled. For example, commitments to the European Community (EC), which currently total only 4.6 million MT, were 14.5 million MT at this time in 1974/75, even though actual shipments for the full year subsequently reached only 11.1 million MT. An increase of 101,900 MT in commitments to the USSR reflected transfers from optional origin sales. Commitments to Mexico increased by 72,200 MT and commitments to Spain and unknown destinations increased by 43,200 MT and 76,200 MT, respectively. Total sorghum commitments increased by 66,700 MT, largely on the basis of higher commitments to the EC to 35,600 MT and to unknown destinations of 26,600 MT.

Soybeans: The apparent export commitment for 1975/76 increased by 91,600 MT, primarily reflecting increased commitments to Spain, Japan, and Korea. Exports during the week totaled 187,900 MT, the lowest weekly volume shipped since September. The major takers were the EC (84,300 MT), Canada (51,000 MT), and Japan (27,200 MT).

Soybean Oilcake and Meal: The apparent export commitment for 1975/76 declined by 83,600 MT, primarily reflecting a decrease in commitments to the EC of 131,100 MT. However, commitments to Canada increased by 41,000 MT. Exports during the week, primarily to the EC and Canada, totaled only 31,700 MT and were the smallest weekly volume shipped since the first week of October.

During calendar 1975, world production of protein meals, estimated at 62.3 million MT soybean meal equivalent (SME), dropped by 5.0 million MT from the 1974 record. This represented the first decline in more than a decade. Despite this decline, the world supply/demand balance

proved to be more than adequate to satisfy the recession-hit markets both here and abroad. Proof of the supply adequacy is shown by the increase in U.S. soybean stocks on September 1, 1975, as well as the significant price reduction during the past year for most oilseeds in world markets.

In 1976, world production of protein meal is forecast at 70.2 million MT SME--7.9 million MT more than last year's reduced volume. Including the large U.S. soybean carryover on September 1, the 1976 world meal supply is expected to total 74.2 million MT, 8.0 million MT above that of last year. During the past decade, world meal consumption has trended upward by about 2.4 million MT per year. World meal consumption in 1976 is expected to increase, but not by enough to offset the large gain in prospective supplies. Therefore, meal is likely to continue to be favorably priced relative to grain in 1975/76.

Cotton: The apparent export commitment in 1975/76 for Upland cotton increased by 46,000 running bales (RB), the second largest increase of the season. Over 80 percent of the increase was for cotton under 1 inch in staple length. New Upland sales of 53,000 RB were predominately to Far Eastern countries. American Pima sales were made to the Republic of Korea (500 RB) and Pakistan (100 RB). Prices in Europe and Japan rose by 120 - 200 points during the week.
